

The Tamil voice your customers will actually answer.

Enterprise outbound calling, in fluent Tamil, at the scale of a contact centre — without the contact centre.

Multi-tenant SaaS

ElevenLabs · Sarvam · Twilio · Exotel

kuralai.automystics.tech

Tamil-speaking customers don't pick up calls from English IVRs.

Chit funds, NBFCs, hospitals and D2C brands across Tamil Nadu still rely on tele-callers reading scripts off paper. Costs are rising, churn is brutal, and English-only AI bots get hung up on within 4 seconds.

₹38 / call

Average human tele-caller cost in TN, 2026

68%

Of TN customers hang up on English/Hindi bots within 4 sec

22%

Annual attrition in BPO tele-calling teams

86 million Tamil speakers. Zero credible Tamil-first voice AI.

- ₹4,200 Cr annual outbound calling spend across TN chit, NBFC, insurance, D2C
- 11,000+ registered chit fund companies — most still call manually
- 3.2 Cr active loan accounts in TN needing weekly EMI nudges
- 0 production-grade Tamil voice agents on the market today

Why now

ElevenLabs v3 + Sarvam Saaras finally produce Tamil that *sounds human*. TRAI's 2025 AI-disclosure framework gives compliant operators a moat. KuralAI is first to combine both with a multi-tenant SaaS chassis.

“வங்கி வேலையில்ல, பேச்சுல வங்கி வேலை.”

KuralAI — outbound voice in Tamil, on autopilot.

A multi-tenant SaaS that lets any organisation upload a contact list, pick a script, and launch thousands of natural-sounding Tamil calls — handled end-to-end by our agent சமுத்ரா (Samuthra).

Speak

Native Tamil with regional cadence — Madurai, Chennai, Kongu

Listen

Real-time barge-in, intent detection, sentiment scoring

Act

Updates CRM, schedules callbacks, triggers payments, logs everything

Scale

1 org or 1,000 — strict tenant isolation, per-tenant keys & quotas

சமுத்ரா

Samuthra · the voice of KuralAI

A neutral, warm, professional Tamil persona trained on real chit-fund and NBFC conversations. She greets, verifies, collects, persuades, and closes — politely, in Tamil — and falls back to a human only when she should.

- Voice cloned with ElevenLabs Multilingual v2 (consent-licensed)
- Tamil ASR via Sarvam Saaras 2 — 96.4% WER on TN dialects
- Personality and tone configurable per tenant in Settings
- Average call: 47 seconds · Cost: ₹3.10

From CSV upload to closed loop, in three clicks.

STEP 1

Upload customers

Drop a CSV or sync your CRM. Tag by chit group, loan bucket, geography. KuralAI deduplicates and DNC-checks instantly.

STEP 2

Pick a script

Choose a ready-made Tamil template (EMI nudge, payment confirmation, satisfaction survey) or design your own in the visual workflow builder.

STEP 3

Launch the campaign

Set concurrency, quiet hours, retry rules. Watch live calls, transcripts, sentiment and outcomes stream in.

The screenshot displays the KuralAI Admin interface. On the left is a dark sidebar with navigation links: Platform Overview, Organizations, Plan Management, Usage & Analytics, and Revenue & Billing. The main content area is titled 'Campaigns' and includes a '+ New Campaign' button. Below the title is a description: 'Create and manage bulk calling campaigns with concurrent dialing'. A dropdown menu shows 'All Statuses'. A table lists campaign details:

NAME	TYPE	ENGINE	STATUS	PROGRESS	CUSTOMERS	CONCURRENCY	CREATED	ACTIONS
new	Due Reminder	KuralAI	Completed	4/4	4	3	13 Apr 2026, 03:03 pm	

At the bottom left of the sidebar, it says 'PRODUCT · HOW IT WORKS' and 'TENANT VIEW'.

A real-time dashboard for every tenant.

Total calls, success rate, average duration, cost per call, sentiment heatmap — refreshed every 5 seconds. Operations leads finally get visibility they never had with humans.

Visual workflow builder for Tamil call flows.

- Drag-and-drop nodes: **Greet · Ask · Branch · Confirm · Transfer · Hang-up**
- Per-node Tamil text + dynamic variables ({{name}}, {{due}})
- Conditional branching on intent, sentiment, DTMF, or API response
- Versioning, A/B testing and per-campaign assignment
- Tenants build their own — no engineer required

Every call. Every transcript. Every recording.

Audit-grade records with searchable Tamil + English transcripts, playback, sentiment timeline, and outcome tagging. Compliance-ready out of the box.
